PROFESSIONAL SUMMARY

Full Stack Developer with 1.6+ years of experience designing and developing scalable web and cross-platform mobile applications using React.js, Next.js, React Native, Node.js, Express.js, PHP, Laravel, MongoDB, and MySQL. Proficient in building RESTful APIs, implementing JWT Authentication, Role-Based Access Control (RBAC), Socket.IO-based real-time communication, and Firebase Cloud Messaging (FCM). Experienced in integrating third-party services, optimizing application performance, deploying Android applications through Google Play Console, and delivering secure, scalable, production-ready solutions in Agile development environments.

TECHNICAL SKILLS

Frontend: React.js, Next.js, React Native, JavaScript, TypeScript, Redux, HTML5, CSS3, Bootstrap, Tailwind CSS

Backend: Node.js, Express.js, Laravel, Core PHP

Databases: MongoDB, MySQL, Oracle SQL, NeonDB (PostgreSQL)

Real-Time & Messaging: Socket.IO, Firebase Cloud Messaging (FCM), Firebase

Cloud & DevOps: AWS (EC2, S3), Docker, Cloudinary

Payments & Third-Party APIs: Razorpay, OpenAI API, Gemini API, Clerk

Tools & Version Control: Git, GitHub, Postman, Selenium WebDriver, VS Code, Android Studio

EXPERIENCE

Full Stack Developer — Ardh Sainik Group

Apr 2026 – Present

- Engineer role-based web and cross-platform mobile modules with React.js, React Native, Node.js, Express.js, PHP, Laravel, MongoDB, and MySQL, supporting 300+ active users across 5 client deployments.
- Build secure REST APIs with JWT authentication and RBAC while integrating Firebase, Razorpay, Cloudinary, and AI APIs to power 10+ production features.
- Implement Socket.IO-based real-time messaging and Firebase Cloud Messaging (FCM), cutting notification delivery latency by 20%.
- Tune database queries and API response times, reducing average response time by 25% and improving application stability.
- Own production deployments and incident resolution, publishing 3 Android releases through Google Play Console.
- Partner with designers, QA, and product teams in Agile sprints to release 12+ features on schedule.

Full Stack Developer — Cling Info Tech Pvt. Ltd.

Mar 2025 – Mar 2026

- Shipped 15+ web and cross-platform mobile features using React.js, Next.js, React Native, Node.js, Express.js, and MongoDB for enterprise clients.
- Designed secure REST APIs with JWT authentication and RBAC, supporting 8 enterprise workflows.
- Created a reusable component and backend module library, cutting new-feature development time by 20%.
- Automated business processes via third-party API integrations and CRUD workflows, reducing manual effort by 30%.
- Improved MongoDB query and API performance, lowering average query time by 25%.
- Provided production support and debugging alongside cross-functional Agile teams, resolving 20+ client-reported issues.

Full Stack Developer Intern — C-DOT

Jan 2025 – Mar 2025

- Automated 4G telecom testing workflows with Selenium WebDriver, cutting manual testing effort by 40%.
- Built interactive React.js dashboards with ApexCharts for real-time telecom monitoring across 6 metrics.
- Developed REST APIs for telecom data processing and real-time communication, handling 1,000+ requests/day.
- Optimized MongoDB queries, reducing redundant processing and improving backend response time by 20%.

PROJECTS

PowerSafe — ERP & Mobile Application

- Built a four-role (Admin, Company, Dealer, C&F) ERP and mobile app for enterprise operations.
- Secured the platform with JWT authentication and RBAC across role-specific modules.
- Established reusable backend services to streamline new-workflow development.
- Improved API response time through MongoDB query optimization.

Theek Hai — Real-Time Communication Platform

- Launched a production-ready messaging platform with one-to-one chat, media sharing, forwarding, and broadcast messaging.
- Built a Core PHP + MySQL admin panel for user management and activity monitoring.
- Integrated Socket.IO and Firebase Cloud Messaging (FCM) for real-time push notifications.
- Deployed production releases through Google Play Console while improving database read performance.

Instructor — Learning Management System

- Built a multi-role (Admin, Parent, Instructor) Learning Management System.
- Delivered attendance tracking, class scheduling, and progress-monitoring modules.
- Structured scalable REST APIs and streamlined MongoDB operations for reliable concurrent access.
- Added Razorpay integration for secure subscription payments.

E-Commerce Platform

- Built a full-featured storefront with product catalog, cart, wishlist, and order management.
- Implemented JWT-based authentication and authorization across user roles.
- Enabled Razorpay for secure online checkout.
- Optimized REST APIs and MongoDB queries to improve page load performance.

QuickAI — AI Content & Image Generation Platform

- Built an AI web app for text and image generation using the OpenAI and Google Gemini APIs.
- Added Clerk authentication with secure session management.
- Tuned backend APIs and database queries for faster response times.
- Delivered a responsive UI with streamlined API integration.

EDUCATION

Bachelor of Technology (B.Tech)

Rajiv Gandhi Proudlyogiki Vishwavidyalaya (RGPV)

Jun 2021 – Jun 2025

CERTIFICATION

Full Stack Development Certification — Naresh i Technologies
